Summary

I am a Computer Science undergraduate specializing with strong foundations in data structures and algorithms. I have experience building machine learning and full-stack applications, backend development, including authentication systems, JWT-based authorization, and working with databases using MongoDB and Mongoose. I have solved 300+ problems on LeetCode, demonstrating consistent problem-solving skills.

Education

- **Bennett University** 2023-2027
Bachelor of Technology CGPA/Percentage: 8.9/10.0
- **Delhi Public School** 2022
Class XII CGPA/Percentage: 96.2
- **Delhi Public School** 2020
Class X CGPA/Percentage: 98

Personal Projects

- **e-DNA Based Environmental Monitoring Project (SIH)**
Tech Used: Next.js (React, TypeScript), Flask, TensorFlow/Keras, scikit-learn
 - Built a web platform to classify species from FASTA DNA sequences using a pretrained deep learning model.
 - Integrated ML pipeline (.h5 model + label encoder) with backend APIs for real-time predictions.
 - Designed REST APIs for smooth frontend-backend communication and data flow.
 - Implemented authentication and an interactive dashboard for result visualization and download.
- **Sanjeevan (GFG Hackfest)**
Tech Used: HTML, CSS, JavaScript, FastAPI, MediaPipe, OpenCV, Random Forest, Agora, WebSockets
 - Developed a real-time video communication system using Agora and WebSockets.
 - Built a gesture recognition module using MediaPipe + Random Forest to detect 48+ hand signs.
 - Designed REST APIs for smooth frontend-backend communication and data flow.
 - Enabled real-time gesture-to-text conversion to assist users with speech impairments.
- **Image Deepfake Detection**
Tech Used: TensorFlow/Keras, CNN, Python
 - Developed a CNN-based model to detect manipulated and AI-generated images.
 - Improved model robustness using preprocessing and data augmentation techniques.
 - Evaluated performance using standard metrics and validated on unseen data.

Technical Skills and Interests

Languages: C++, Java, Python, SQL
Web Technologies: HTML, CSS, JavaScript, React
Developer Tools: VS CODE, Git, Github
Soft Skills: Leadership, Event Management, Public Speaker

Positions of Responsibility

- **Joint Secretary, Astronomy Club, Bennett University** July 2024 – May 2025
– Organized astronomy-focused events including astrophotography sessions and themed campus activities to increase student engagement.
- **Marketing and Sponsorship Lead, Full-Stack Club, Bennett University** July 2024 – May 2025
– Led marketing and outreach initiatives to promote technical events and workshops across campus. Delivered an academic guidance session on SGPA optimization and effective study strategies, achieving 9.2 SGPA personally.

Certifications

- **Neural Networks and Deep Learning** DeepLearning.AI (Coursera) March 2025
- **Machine Learning: Classification** University of Washington (Coursera) October 2024
- **Algorithmic Toolbox** University of California San Diego (Coursera) March 2025
